SCRIPT:

```
a=int(input())
b=int(input())
c=a+b
print ("The sum is", c)
```

The screenshot displays the PyCharm IDE interface. The main editor window shows a Python script named `main.py` with the following code:

```
1 a=int(input())
2 b=int(input())
3 c=a+b
4 print ("The sum is", c)
```

The Run console at the bottom shows the execution of the script. The command executed is `C:\Users\HP\PycharmProjects\IBM\venv\Scripts\python.exe C:/Users/HP/PycharmProjects/IBM/main.py`. The output shows the program taking inputs 4 and 8, calculating the sum, and printing "The sum is 12". The process finished with exit code 0.
